30/09 - 02/10 2026 PALERMO

RoadLCA2026

RoadLCA 2026

The **7th International Symposium on Life Cycle Assessment for Pavements and Bridges**, will take place in Palermo, Italy.

ROADLCA brings together researchers, engineers, road authorities and industry to advance life cycle thinking for sustainable transport infrastructure, with a focus on roads, pavements and bridges, and contributions also covering railways and airports.

The symposium will address sustainability, resilience and decarbonisation across all life cycle stages: design, materials, construction, use and end of life, in the context of climate change, highlighting global best practices and the role of policy in scaling and harmonising solutions in Europe and beyond.

The targeted audience follows:

- Road Administrators at all levels, national managers, regions, cities, towns
- Asset management professionals
- Pavement design and maintenance engineers
- Researchers and academics
- Industry professionals
- Policymakers and government representatives
- Infrastructure project managers
- Sustainability and environmental professionals
- Students and early-career professionals
- Technology providers.
